

# Drilled Plates and Baskets

**HERGEN**  
PAPER MACHINERY

*A special design to each application.*

Hergen offers the most recent technology in drilled plates manufacturing.

They can be used in selectfiers screen, vibration screen, turbo separators and pulpers for all brands and models.

The modern and precise drilling process allows us to make holes with small diameter in thick plates.

We guarantee high quality and durable equipments.

The cylinder-tapered orifices starts from  $\varnothing 1,5$  mm.

Hergen's technical department develops ways to enable optimization of the screen open area according to the customer's necessity.
